GENERAL TERMS AND CONDITIONS FOR GAS SERVICE

6. CUSTOMER'S SERVICE OBLIGATIONS

6.01 Customer's Appliances and Piping:

6.01.01 Customer's Piping: The term "customer's piping" is used to designate all piping, fixtures, valves, appliances and apparatus of any kind or nature on customer's side of the point of delivery. All piping shall be installed and maintained by customer at customer's expense in conformity with these General Terms and Conditions, Orders and Rules and Regulations prescribed by the Commission and state and local governmental standards and/or requirements. Where Company's rate schedules provide for different classes of service, customer's piping, at customer's expense, shall be so arranged that each class of service can be metered separately. If customer's piping cannot be so arranged, Company shall reserve the right to assign rate schedules and priority to customer's total requirement.

6.01.02 Multi-Metering Installations: Where building or premises are occupied by more than one customer, Company will set as many meters as there are separate applications for service. Customer piping shall be so arranged as to permit the installation of Company's meters adjacent to each other and shall not be interconnected. Customer piping shall be clearly and permanently marked to indicate the particular customer supplied by it

GENERAL TERMS AND CONDITIONS FOR GAS SERVICE

6.02 Standards and Approvals of Customer's Facilities:

6.02.01 Compliance with Safety Requirements: All piping, appliances and appurtenances installed by customer shall be of types certified by the American Gas Association and/or listed by the Underwriters Laboratories. These installations shall also meet the standards of the National Fire Protection Association and shall comply with federal, state and municipal codes insofar as they apply and all reasonable requirements of Company, and shall be maintained by customer in a good, safe and serviceable condition.

6.02.02 Inspection and Testing of Customer's Facilities: Prior to the original connection of service to any specific location, customer's piping, appliances and appurtenances shall be inspected and approved by a city inspector or other such authorized person for the proper receipt and use of utility service. If a certificate of approval is required by local authorities, it shall be obtained by customer at customer's expense. In the absence of an authorized person representing a governmental agency, the facilities will be inspected by a representative of Company. Such Company inspection shall not impose on Company any responsibility or liability for the safe condition of the facilities. After the commencement of service, Company will not be obligated to inspect customer's facilities, although at its discretion, Company shall have the right to inspect and test customer's facilities for suspected unsafe conditions at any time.

6.03 Defective Customer Equipment: In any case where Company discovers that a dangerous condition exists with regard to customer's appliances, equipment, or piping, it may, without advance notice, shut off the service and immediately notify customer. Service shall not be resumed until such dangerous condition has been eliminated. If customer is aware that gas is escaping from any equipment or pipe in or about customer's premises, or in case of interruption of service, customer shall notify Company at once.
