SERVICE**
A DIVISION OF ONEOK

CONSERVATION PROGRAM

Food Service/Restaurants

Cash incentives are available for restaurants or future restaurants for the purchase and installation of specific high efficient gas-fired cooking equipment. Texas Gas Service customers with a rate code of B12, B1B, B1C and B1D are eligible for the cash incentive programs. For more information, call 370-8243. All equipment must be inspected and approved by a Texas Gas Service Conservation Program Representative prior to payment.

<u>Type of Equipment</u>	<u>Rebate/Unit</u>
Infra-red Fryers	\$400
Convection Ovens	\$400
Conveyor Ovens	\$400
Infra-red Griddles	\$200

Water Heaters

Water heating is the second largest gas use in the commercial sector. This program is available for existing commercial facilities, facility expansions and new construction.

<u>Water Heaters</u>	<u>Efficiency</u>	<u>Incentive</u>
75,000 BTU	82 - 86% TE	14% of Equipment Cost
75,000 BTU	87 - 100% TE	20% of Equipment Cost

Note: Please include written proposal with incentive application in order to determine incentive amount. Written proposal should have equipment itemized separately.

Booster Heaters

The gas booster heater's high temperature rinse eliminates chemical use and minimizes dish-drying time, lowers dish inventory requirements and increases the dishwashing production rate. Since it eliminates the electric booster heater, it also significantly reduces electric demand charges. The precise, consistent water temperatures decrease pre-wash dish preparation, saving labor and hot water. Gas booster heaters are available in under-the-counter and wall-mounted models.

<u>Incentive</u>	<u>Min Efficiency</u>
\$500 per Unit	80% TE

- ◆ Incentive programs are available on a first-come, first-served basis. The funding and/or guidelines for the programs may be changed or discontinued at any time without notice.
- ◆ For more specific information about these programs, please call 370-8243.
